Make YouTube say "YouTube Podcasts"

Let's change the m-dashes on the home page to the same as what we use on the entry pages.

Development <ul style="list-style-type: none">— Full-stack development— API integration— AI/ML implementation	AI & ML <ul style="list-style-type: none">— LLM integration— Automated systems— Intelligent tools
Creative Tech <ul style="list-style-type: none">— Digital content automation— Creative tool development— Visual processing	

Let's add a fourth for Graphic Design with an AI spin on it

What size image do we need for the background of the hero?

Full-Stack Developer & Creative Technologist

Bridging technology and creativity to build innovative digital experiences

Right now only the top link is a hyperlink instead of the entire tile

Real-Time Social Media Innovation

Pioneered Super Bowl marketing strategies with real-time response systems, leveraging automation for immediate engagement.

Automation

Social API

Real-time Processing

Let's also make the arrow a tiny bit bigger. And use a lighter weight for the summary text. And when we hover anywhere on the tile we have the header text on the title change color?

Is there a long term plan for the square tags? (Grouping when clicked?) If not, or if not for a while, can we make them change color on hover or something interesting?

The hyperlinks on the right of the homepage nav bar look great (they change to a teal). Can we do the same for my name and use it as a button to go home? Even if we don't use it on other pages, that is okay because it is a norm.
